

## Students Testing in Outplacement Programs

Some students in North Dakota outplacement programs may already have TIDE student records in their *resident school district*, which will prevent outplacement programs from testing these students. If an outplacement program is unable to test a student due to the student's TIDE record existing in another school district, contact NDDPI to have the student's record moved from their *resident school district* to the outplacement school. *Resident schools* that continue to have TIDE records for students in outplacement programs after the testing window closes should enter the proper non-participation codes for those students in TIDE. To contact NDDPI, call Rob Bauer at 701-328-2224 or email [rgbauer@nd.gov](mailto:rgbauer@nd.gov).
