[Find Your Textbook](#)

This free search [tool](#) helps educators, parents and students find targeted resources to supplement the textbook material. Users can search over 600 textbooks by title, ISBN, publisher, state edition or course.

[Math@Home®](#)

[Math@Home](#) provides access to a growing number of family-friendly mathematical resources that support the textbook lessons or math topics a child is studying in school.

[Quantile Growth Planner™](#)

You may wonder if a child will be prepared for the mathematic requirements of college and the workplace upon graduation. The Quantile Growth Planner provides some insight on this topic. With the Quantile Growth Planner, you can chart a child's growth across different annual state assessments, forecast future growth, compare that forecasted growth with the math demands of college and careers, and, if needed, identify a custom growth path to ensure the child graduates college- and career-ready.

[Summer Math Challenge](#)

The Summer Math Challenge is a free math skills maintenance program based on grade-level standards that help prepare students for college and careers. The program

is targeted to students who have just completed grades 1 through 8 and is designed to help kids retain math skills learned during the previous school year. Parents will receive daily emails with fun activities and links to educational resources throughout the six week program. When the program ends parents can print an award certificate to celebrate their child's summer math accomplishment!
