

Student Designated Supports and Accommodations Provisioning in TIDE

Updated: January 15, 2019

The initial load of student designated supports and accommodations (i.e., Test Settings) is based on IEP data in STARS, which is updated daily from TieNet finalized documents. After this initial load from STARS, districts are responsible for maintaining and updating student designated supports and accommodations in TIDE.

Accommodations are intended for students on IEP's and 504 plans. The students' IEP case managers, 504, or ILP teams should be consulted before any changes are made to the TIDE test settings.

I. Three options for districts to update designated supports and accommodations (i.e., Test Settings)

1. Districts always have the option to enter TIDE to add or edit designated supports or accommodations of individual students. ***Please note: Accommodations and designated supports are to be selected according to what is documented in the student's IEP, 504, or ILP plan.***
2. Districts can also enter student designated supports or accommodations to a template for upload into TIDE. This template is available as a download file from TIDE.
3. IEP designated supports and accommodations entered into TieNet are uploaded to STARS daily. Districts can export a student file from STARS with IEP designated supports and accommodations in the TIDE upload format. Districts can then upload the STARS exported designated supports and accommodations into TIDE.

Note that none of these uploads of designated supports or accommodations in TIDE will change existing TIDE student demographic information (e.g., name, school, district, birthdate) for those students.

II. Instructions for creating or updating student designated supports and accommodations

Option 1 Instructions:

Add or edit designated supports or accommodations on an individual student record.

Refer to the *TIDE User Guide (2018-2019), Section IV, Preparing for Testing, Managing Student Test Settings and Tools, Viewing and Editing Test Settings and Tools.*

Option 2 Instructions:

Enter student designated supports or accommodations (*Test Settings*) to a template for upload into TIDE.

To create a file of student *Test Settings* to upload to TIDE, follow the instructions in the *TIDE User Guide (2016-2017), Section IV, Preparing for Testing, Managing Student Test Settings and Tools, Uploading Test Settings and Tools*, for instructions on student file uploads.

Option 3 Instructions:

Export a student accommodations file (*Test Settings*) from STARS Enrollment to a TIDE template for upload to TIDE.

The upload process is identical to the instructions given for upload of student test settings under Option 2. However, the file for uploading is generated directly from the STARS Enrollment system based on the status of designated supports and accommodations from IEPs in TieNet. The screen shots that follow provide guidance on exporting a district's student IEP accommodations file from STARS for upload into TIDE.

Logon to the STARS system. Under *Fill Out Reports*, click on **Enrollment**, select **2018-2019** from the *School Year* dropdown list, and click on the **Select** button.

Fill Out Reports

To fill out or view a report, first select the report from the tree view by clicking on the plus sign to expand the tree and then click on the educational unit for the report. After you click on the educational unit, a box will be displayed on the page that displays the contact information for the selected report. Select the school year and click "Select" to enter the report.

Students

Enter the filter criteria and click Filter to retrieve the students matching the criteria. To search for and add a new student to the district click on the plus sign to expand the tree and then click on the educational unit for the report. After you click on the educational unit, a box will be displayed on the page that displays the contact information for the selected report. Select the school year and click "Select" to enter the report.

After the students have been displayed, click on the student's last name to view the student record or on the start date to view the student's detail record.

Check to return only the most recent student detail record for a student.

Select **Save File** and click on the **OK** button.

NOTE: Do not click on the **Open with** option and then save the file. This will change the format of the file to an undesirable format that will not upload to TIDE.

Caution: Once the csv file is created in your *download folder* on your computer, Do Not open the file and resave it. Opening and saving the file will change the file to an undesirable format that cannot be uploaded to TIDE. The file can only be uploaded if it remains in the csv format that was exported from STARS.

TIDE Test Settings Upload

Enter into your TIDE account and follow the upload procedure described in Option 2 and in the *TIDE User Guide (2018-2019), Section IV, Preparing for Testing, Test Settings and Tools, Uploading Test Settings and Tools*, to upload the student accommodations (*Test Settings*) in TIDE.

If your file contains a large number of records, TIDE displays the validation results for only a portion of those records and then completes the processing offline. To determine if the file uploaded successfully, you may go to the TIDE *Upload Students* page and click the “+” next to *Upload History*. You will see the upload status of all file uploads, including a validation report, records rejected, and records processed. You can examine the rejected records to troubleshoot the reason for rejection.

NDSA Service Desk

Please contact the NDSA Service Desk with any questions pertaining to the updating of student accommodations and designated supports.
